**Weight:** 138.00g  
**Dimensions:** 170.00mm x 95.00mm x 55.00mm

**Price: \$35.00**

## Description

The best treatment for [dry eye](#) is your own natural tear film. The EyeGienie® Insta-Warmth System™ is designed to stimulate your body's natural tear oil flow through a proven combination of gentle warmth and soothing eye mask.

The tear film includes a lipid layer on the surface of your tears. This film prevents tears from evaporating immediately from the surface of the eye. Without the lipid layer, tears do not have adequate time to protect the eye before evaporating, and vision becomes blurry.

By warming the meibomian glands and increasing the flow of meibum (the oils responsible for the lipid layer), the EyeGienie® Insta-Warmth System™ restores and stabilizes the natural tear film, allowing tears to work more effectively and relieve symptoms.

Our EyeGienie® experience begins when you slip the disposable Warming Wafers into the ultra-soft eye mask, get comfortable, and relax. Within minutes, the wafers begin to administer their precision warming treatment.

For the next 10-15 minutes, you simply unwind as the light application of therapeutic warmth and relaxation encourage your eyelid glands to release their natural soothing oils onto the eye surface.
